Visit Notes

On June 15, 2026 Johnathan Doe came in to see Dr. Jane Waterson. The patient's vitals looked normal, but when observing the back of his throat an abundance of drainage was detected. Johnathan says that he was feeling fine today, but for the past week he had been dealing with a sore throat, as well as, a stuffy nose. He tested negative for strep. He seems to have been dealing with sinusitis. To be on the safe side he will be prescribed Amoxicillin and a Saline Nasal Spray.
